Subject Command Requests

## Description of Problem or Suggestion:

Command requests will only allow user to request that "Command Procedures" be executed. Command Procedures are under CCB control. Therefore, if a user wants to respond to an emergency that no contingency procedure exists for, they will have to:

- 1) Create Procedure
- 2) Submit to CCB
- 3) Have it approved
- 4) Generate command request
- 5) FOT will execute

Too many steps (Story changed from dry run to CDR)

## Originator's Recommendation

Provide capability for user to enter commands and timing information onto a command request.

GSFC Response by:

GSFC Response Date

HAIS Response by: Jim Creegan

HAIS Schedule

HAIS R. E. Scott Carter

HAIS Response Date 11/3/95

Based on the extensive discussion at the CDR dry run, we have provided the capability to enter commands directly into a command request as suggested by Mr. Svoboda.

Status Closed

Date Closed 11/14/95
